

Features

- 2CH balanced XLR microphone/line input;
- 2CH balanced XLR line output;
- Ethernet power supply that meets the 802.3af standard is required, and Ethernet power supply network switch that meets the requirements shall be used;
- Three input gain levels to meet with the common line levels, phantom power and dynamic microphone;
- Each channel with +48V phantom power, which can provide power for nearly all types of phantom power microphones of fixed installation systems;

Technical Specification

Analog input channel	2	THD+N	<0.002% @ 4dBu
Analog output channel	2	Background noise	-97dBu
Dante type	Ultimo 2	Input impedance	20 kΩ
Analog Max. gain	20dB	Output impedance	100Ω
Frequency response	±0.2dB (20~20kHz)	Channel isolation	100dB @ 1kHz
Max. leve	+8dBu , balanced	Power supply	PoE
Size	W110×H110×D50 mm
